

Kindergarten Immunization Data

Statewide, nearly 86% of kindergarten students completed all school-required vaccines in the 2025-2026 school year. Between 88% to 93% of kindergartners completed each individual required vaccine in the state, but these rates differ within individual counties. Use the year and county selection tools to change the displays of vaccination rates. *Note: county-specific immunization rates are not available for 199.*

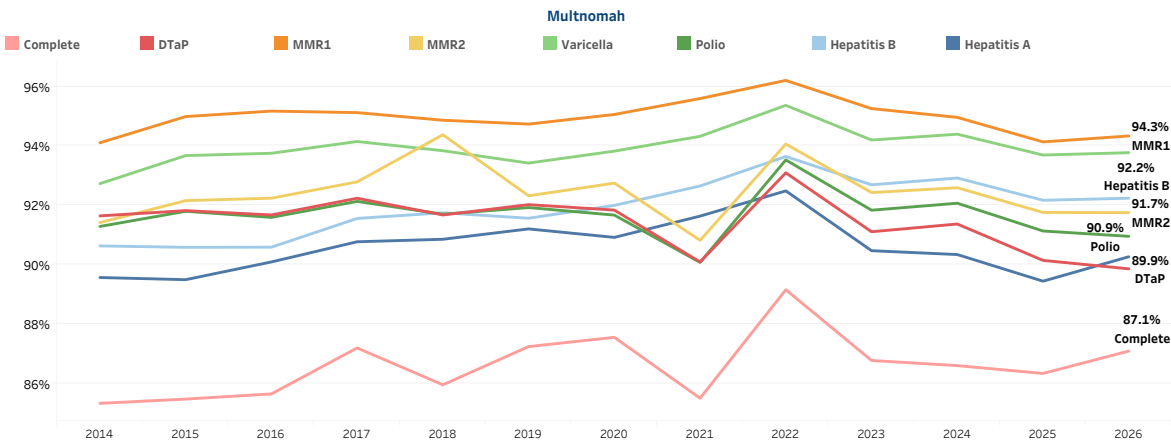

Select county: Multnomah
Year: 2026

The map shows the percent of kindergartners who are complete for school-required vaccines by county. Click on the vaccine to update the map and chart. The **accent color** highlights counties with the **highest** immunization rates.

Kindergarten vaccination rates for DTaP (Diphtheria, Tetanus and Pertussis), Hepatitis A, Hepatitis B, MMR (1st dose of Measles, Mumps and Rubella), 2nd dose of Measles, Polio, and Varicella are shown from 2014 to 2026. Immunization rates have steadily declined over the past few years.

As context for interpreting the county-level data, the table below contains 2025-2026 kindergarten enrollment and school counts as well as population estimates from Portland State University's (PSU) 2025 Annual Population Report Tables. Counties with smaller student populations may see large changes each..

	Year	Number of sites serving kindergartners	Kindergarten site enrollment	<5-year-olds (PSU)	Total Population (PSU)
Multnomah	2026	166	6,386	33,866	805,570

Notes: Data come from the Immunization Reports (section E-H) collected annually in March; 1983-2003 include Kindergarten and 1st grade; 2004 onward include Kindergarten data alone; 1983-2014 include public, private and online schools; 2015 onward, statewide rates include public, private and online schools while county rates include only public and private schools; data censored for counties and years where enrollment falls below 10 children; 1983-2009 and 2023 onward, NCPHD included Wasco and Sherman; Gilliam was part of NCPHD from 2010-2022 a..
